SUMMARY

Applicant conducted interview with Examiner Nguyen on April 5, 2006. Applicant discussed as indicated in its response to the Final Office Action mailed on January 17, 2006, that the Kinnunen reference did not cure the deficiency in Ash sufficient to establish a *prima facie* case of obviousness with respect to claims 1-10, 14-29, 32-37, and 39-42. Kinnunen states that a new connection can be rejected based on the bandwidth of the request. However, Kinnunen does not teach or suggest that a connection can be rejected based on whether the connection is voice or data. The same deficiency exists with respect to claims 11-13, 30, 31, 38, and 43-46. The Examiner agreed with Applicant's remarks that Kinnunen did not teach that a new connection can be rejected based on whether the connection is voice or data.

Respectfully submitted,
